GF 214 is a 3.2-mil white matte flexible calendered PVC film coated with 200-5000 clear permanent acrylic pressure sensitive adhesive laminated to a 70# layflat liner. This vinyl film is designed to accept a variety of solvent, eco solvent, latex and UV curable inks common to wide format digital printing systems. This adhesive produces permanent bonds to a variety of common substrates used in graphic applications.

Applications
GF 214 is designed for interior or exterior signage, decals, nameplates and point-of-purchase displays.

Thickness
- Film: 3.2 mils.
- Adhesive: 0.8 to 1.0 mils.
- Liner: 5.3 mils.
(Thickness variance +/- 10%)

Dimensional Stability
Good under normal conditions. Heat and age may accelerate vinyl shrinkage.

Temperature Ranges
- Minimum application temperature: +40°F.
- Service temperature range: -40°F to +180°F.

Expected Exterior Exposure
Up to 3 years under normal exposure conditions.

Adhesion
To stainless steel: 40 oz/in.
PSTC-101 Method A with 24 hrs. dwell at 70°F and 50% relative humidity. Typical values. Individual values may vary. Test thoroughly before production.

Water Resistance
Limited immersion resistance. Test for specific application.

Humidity Resistance
Good.

Storage Stability
One (1) year shelf life when stored at 70°F and 50% relative humidity.

Product Codes
- 214-30: (30" X 150' roll)
- 214-54: (54" X 150' roll)
- 214-60: (60" X 150' roll)

Recommendations
Completely evaporate inkjet solvents before application. Failure to do so may facilitate solvent penetration resulting in vinyl degradation.
