

GF 209AE METROMARK®

GF 209AE MetroMark® is a conformable opaque film designed for short-term transit advertising. The clean removing MetroMark adhesive is combined with an air egress liner to create a trustworthy solution that installs beautifully on smooth surfaces. The high opacity of the face film makes for excellent coverage over existing designs and decals while removing the need for a grey adhesive to aid with blackout. GF 209AE MetroMark has an excellent white point, perfect for printing across Eco-Solvent, Solvent, Latex and UV print systems.

Unique Features:

- Excellent blackout capabilities to cover underlying graphics and paint
- Engineered to resist cold cracking
- Brilliant white point for vibrant printing
- Air egress technology for faster installation and easier removal
- Removable adhesive works on OEM painted metal, glass, painted drywall, and more!

Applications:

- Transit Graphics
- Wall Decals
- Window Signage
- POP & Retail Signage

Ink Compatibility:
